 Silverman & Klestadt

September 14, 4 pm - 5:00 pm EST

CCS/CES/MCS/MES
 points will be available.

REGISTRATION:

**CONNECT & NADEC
 Members: \$25**

Non-Members: \$35

Ongoing delays and shortages involving our nation's supply chain affect all areas of commerce. To discuss these issues and how they impact all of us, as well as potential remedies that could be utilized, we will hear from experts who are directly involved in the supply chain challenges we face.

Discussion will cover:

- How the Ocean Shipping Reform Act and the FMC are changing ocean shipping – from demurrage/detention to carrier/shipper relations.
- With the equipment shortages landside, labor shortages – especially among truck drivers – can the US supply chain work out the kinks of the post-COVID "new normal"?
- Provide an overview of the latest US sanctions and export control measures affecting Russia and Belarus. Explore where we go from there.
- China COVID Lockdowns and the "bullwhip effect" on the supply chain: Will falling consumer demand in the US and Europe and lower container volumes mitigate supply chain choke points in the US?
- Given the emphasis on de-coupling from China, what is the future market for US exports in the PRC?
- New Export Controls
